Subject: Savage Conveyors # 2549

Hi Priscilla,

This amendment does not effect either the current Cultural resource or Biology sections of the approved MRP. The addition of the four conveyors lies within the current disturbed area. These disciplines would apply to the restarting the prep plant with the new settling ponds, (task 2524). I believe this "E" mail should be ample justification for not preparing a technical memo explaining that there are no changes to the Biology or Cultural Resource sections of the current MRP.

Thanks,
Joe, assigned Biologist for Cultural Resources and Biology
